and/or digital versions of this map. The FEMA Map Service Center may also provide community locations.

Please note that the FIRM is for use in administering the National Flood Insurance Program. It is not intended to determine individual property

To obtain more detailed information in areas where floodways were based on hydraulic considerations between cross sections. The floodways were shown on this map, please contact the Information Services Branch of the National Geodetic Survey at the following address:

Silver Spring, MD 20910-3282

National Geodetic Survey

This map is for use in administering the National Flood Insurance Program. It is not intended to determine individual property risks associated with flooding.

Base Flood Elevations

Please refer to the separately printed Base Flood Elevations report (which contains authoritative hydraulic data and flood elevations) for an overview map of the floodways. These elevation data must be compared to structure and development characteristics.

The Floodway

This map shows the ground elevations in feet above mean sea level of all points within the floodway. The floodway is the area of land shown in blue on this map. This area is subject to flooding during the base flood event.

The Base Flood Elevations (BFEs) shown on the FIRM represent the flood elevations when the 1% annual chance flood event occurs.

The flood elevations shown on this map are approximate. The exact flood elevations are available in the Base Flood Elevations report.

If you have questions about the map or other flood-related issues, please contact the Information Services Branch of the National Geodetic Survey at the following address:

Silver Spring, MD 20910-3282

National Geodetic Survey

North American Vertical Datum of 1929 (NAVD 29) of 0.0'. Users of this map should be aware that NAVD 29 is an older vertical datum that is not consistent with the current National Geodetic Datum of 1988 (NGVD 88).

To determine the correct elevation for a New York State community, please contact the National Geodetic Survey at the following address:

Silver Spring, MD 20910-3282
