NOTES TO USERS

The map is for use in administering the National Flood Insurance Program. It does not represent current or future flood plain boundaries. Flood plain boundaries should be determined only by consulting the Flood Insurance Rate Map (FIRM) for the area or by visiting the FEMA website at http://www.fema.gov/.

The map was produced by the United States Army Corps of Engineers. Data for this map were obtained from the United States Geological Survey, State Flood Control Boards, and other agencies. The Corps also used data from earlier maps and charts, maps and charts available from other agencies, and other sources.

This map should be used with caution as a planning tool or to determine flood plains. The map does not depict all existing flood plains, but instead depicts those that have been defined as flood plains in the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Maps (FIRMs). The map should not be used for construction or floodplain management purposes (BFEs) and/or have been determined, users are encouraged to consult the FIRM for use in administering the National Flood Insurance Program. It is not intended to depict all existing flood plains, but instead depicts those that have been defined as flood plains in the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Maps (FIRMs). The map should not be used for construction or floodplain management purposes (BFEs) and/or have been determined, users are encouraged to consult the FIRM for use in administering the National Flood Insurance Program.
