NOTES TO USERS

The map is for use in administering the Federal Flood Insurance Program. It does not represent current topography. Therefore, jurisdictional boundaries displayed may not be current. This map also reflects the most current data available at the time it was published. It does not reflect changes in jurisdictional boundaries or new or updated floodplains that may be determined after publication of the map.

The map is for use in administering the National Flood Insurance Program. It reflects floodplains and floodways. Floodplains are areas subject to flooding in the direct path of the principal stream. Floodways are areas of greater potential for flooding, which are generally based on hydraulic considerations.
