FINDINGS, CONCLUSIONS AND DECISION

FINDINGS OF FACT

Based on all the evidence of record, the following findings of fact are entered.

1. The master list of exhibits and witnesses which is a part of this file and which exhibits were considered by the Examiner, is hereby made a part of this file, as if set forth in full herein.

2. The DPW reviewed the request with regard to traffic mitigation and road design standards. That review covered Title 13 SCC and Chapter 30.66B SCC as to road system capacity, concurrency, inadequate road conditions, frontage improvements, access and circulation, and dedication/deeding of right-of-way, state highway impacts, impacts on other streets and roads, and Transportation Demand Management. As a result of that review, the DPW has determined that the development is concurrent and has no objection to the requests subject to various conditions.
3. The project would comply with park mitigation requirements under Chapter 30.66A SCC by the payment of \$1244.49 for each new single-family home.
4. School mitigation requirements under Chapter 30.66C SCC have been reviewed and set forth in the conditions.
5. A Type IV stream and a Category 4 wetland will be preserved in a Native Growth Protection Area (NGPA).
6. The PDS Engineering Division has reviewed the concept of the proposed grading and drainage and recommends approval of the project subject to conditions, which would be imposed during full detailed drainage plan review pursuant to Chapter 30.63A SCC.
7. The Snohomish County Health District has no objection to this proposal provided that public water and sewer are furnished. Public water and sewer service and electrical power will be available for this development.
8. The request complies with the Snohomish County Subdivision Code, Chapter 30.41A SCC as well as the State Subdivision Code, RCW 58.17. The proposed plat complies with the established criteria therein and makes the appropriate provisions for public, health, safety and general welfare, for open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools and school grounds, and other planning features including safe walking conditions for students.
9. The proposed plat also meets Chapter 30.41A SCC requirements. A complete application for the proposed plat was received by PDS on May 31, 2005. The proposed plat as conditioned also meets the general requirements under Section 30.41A.100 with respect to health, safety and general welfare of the community as noted in this report. As proposed, the subject lots will not be subject to flood, inundation or swamp conditions. The lots as proposed are outside of all regulated flood hazard areas. As conditioned, the plat will meet all SCC 30.41A.210 design standards for roads.
10. The request is consistent with Section 30.70.100 SCC, which requires, pursuant to RCW 36.70B.040, that all project permit applications be consistent with the GMACP and GMA-based county codes.
- ~~11. The request is for a rezone from 1~~
12. The site and immediately surrounding properties are a mix of R-9600, R-7200 and R-7200 PRD zones.
13. Chapter 30.42A covers rezoning requests and applies to site specific rezone proposals that conform to the Comprehensive Plan. The decision criteria under SCC 30.42A.100 provides as follows:

¹ Scrivener's error – Finding deleted. 7/24/07
05127253.doc

The hearing examiner may approve a rezone only when all the following criteria are met:

- (1) The proposal is consistent with the comprehensive plan;
 - (2) The proposal bears a substantial relationship to the public health, safety, and welfare; and
 - (3) Where applicable, minimum zoning criteria found in chapters 30.31A through 30.31F SCC are met.
14. The Snohomish County Health District has no objection to this proposal provided that public water and sewer are furnished. Public water and sewer service will be available for this development as well as electrical power.
 15. The property is designated Urban Low Density Residential (ULDR 4-6 du/ac) on the General Policy Plan (GPP) Future Land Use Map (FLUM) and is located within an Urban Growth Area (UGA). According to the GPP, the ULDR designation covers various subarea plan designations which would allow mostly detached housing developments on larger lot sizes. Land in this category may be developed at a density of 4-6 du/ac and one of the implementing zones is the R-7200 zone which is the case here.
 16. The request is consistent with Section 30.70.100 SCC (Section 32.50.100 SCC), which requires, pursuant to RCW 36.70B.040, that all project permit applications be consistent with the GMACP, and GMA-based county codes.
 17. Exhibit 12 is an aerial photograph which very clearly shows the property itself and the surrounding area and its compatibility in this area.
 18. Any Conclusion of Law in this Report and Decision, which should be deemed a Finding of Fact, is hereby adopted as such.

CONCLUSIONS OF LAW

Based on the findings of fact entered above, the following conclusions of law are entered.

1. The Examiner having fully reviewed the PDS staff report, hereby adopts said staff report as properly setting forth the issues, the land use requests, consistency with the existing regulations, policies, principles, conditions and their relationship to the request. It is therefore hereby adopted by the Examiner as a conclusion as if set forth in full herein, in order to avoid needless repetition.
2. The Department of Public Works recommends that the request be approved as to traffic use subject to conditions specified below herein.
3. The request is consistent with the (1) GMACP, GMA-based County codes, (2) the type and character of land use permitted on the site, (3) the permitted density, and (4) the applicable design and development standards.
4. Any Finding of Fact in this decision which should be deemed a Conclusion of Law is hereby adopted as such.

DECISION

Based on the findings of fact and conclusions of law entered above, the decision of the Hearing Examiner on the application is as follows:

The request for a 31-lot **RURAL CLUSTER SUBDIVISION** on seven acres is hereby **APPROVED**, subject to the following conditions:

CONDITIONS

- C. The following additional restrictions and/or items shall be indicated on the face of the final plat:
 - i. "The lots within this subdivision will be subject to school impact mitigation fees for the Northshore School District No. 417 to be determined by the certified amount within the Base Fee Schedule in effect at the time of building permit application, and to be collected prior to building permit issuance, in accordance with the provisions of SCC 30.66C.010. Notice of these mitigation payment obligations shall be contained in any deeds involving this subdivision or the lots therein. Once building permit has been issued all mitigation payments shall be deemed paid.

 - iii. All Critical Areas shall be designated Native Growth Protection Areas (NGPA) (unless other agreements have been made) with the following language on the face of the plat;

"All NATIVE GROWTH PROTECTION AREAS shall be left permanently undisturbed in a substantially natural state. No clearing, grading, filling, building construction or placement, or

road construction of any kind shall occur, except removal of hazardous trees. The activities as set forth in SCC 30.91N.010 are allowed when approved by the County.”

The election to postpone payment shall be noted by a covenant placed on the face of the recorded plat and included in the deed for each affected lot within the subdivision.

D. Prior to recording of the final plat:

The platlor may use other permanent methods and materials provided they are first approved by the county. Where an NGPA boundary crosses another boundary (e.g.: lot, tract, plat, road, etc.), a rebar marker with surveyors’ cap and license number must be placed at the line crossing.

NGPA signs shall have been placed no greater than 100 feet apart around the perimeter of the NGPA. Minimum placement shall include one Type 1 sign per wetland, and at least one Type 1 sign shall be placed in any lot that borders the NGPA, unless otherwise approved by the county biologist. - iv. The final wetland mitigation plan shall be completely implemented.

E. All development activity shall conform to the requirements of Chapter 30.63A SCC.

Nothing in this permit/approval excuses the applicant, owner, lessee, agent, successor or assigns from compliance with any other federal, state or local statutes, ordinances or regulations applicable to this project.
