PUBLIC HEARING

The public hearing commenced on February 8, 2007 at 9:32 a.m.

1. The Examiner announced that he had read the PDS staff report, reviewed the file and viewed the area and therefore was generally apprised of the particular request involved.
2. The applicant, Innovative Investments, Inc., was represented by Terry Ostergard, Snohomish County was represented by Paul MacCready of the Department of Planning and Development Services.

The hearing concluded at 9:43 a.m.

NOTE: For a complete record, an electronic recording of this hearing is available in the Office of the Hearing Examiner.

FINDINGS, CONCLUSIONS AND DECISION

FINDINGS OF FACT

Based on all the evidence of record, the following findings of fact are entered.

1. The master list of exhibits and witnesses which is a part of this file and which exhibits were considered by the Examiner, is hereby made a part of this file, as if set forth in full herein.
2. Applicant proposes to subdivide a 21.46 acre site into six single-family lots using the Rural Cluster Subdivision provisions of the Snohomish County Code. Restricted open space tracts would cover 65% of the total area. Access would be from 324th Avenue NW by easement from property to the north.

3. The DPW reviewed the request with regard to traffic mitigation and road design standards. This review covered Title 13 SCC and Chapter 30.66B SCC as to road system capacity, concurrency, inadequate road conditions, frontage improvements, access and circulation, and dedication/deeding of right-of-way, state highway impacts, impacts on other streets and roads, and Transportation Demand Management. As a result of that review, the DPW has determined that the development is concurrent and has no objection to the requests subject to various conditions.
4. The project would comply with park mitigation requirements under Chapter 30.66A SCC by the payment of \$811.29 for each new single-family home.
5. School mitigation requirements under Chapter 30.66C SCC have been reviewed and set forth in the conditions.
6. There are four wetlands on the site: one Category 2, two Category 3 and one BMP Category 3. The BMP wetland will be filled for development of a road. The other wetlands will be placed in Native Growth Protection Areas (NGPA).
7. The PDS Engineering Division has reviewed the concept of the proposed grading and drainage and recommends approval of the project subject to conditions, which would be imposed during full detailed drainage plan review pursuant to Chapter 30.63A SCC.
8. The Snohomish County Health District has no objection to this proposal provided that public water and sewer are furnished. Water and sewer service will be from private wells and seven septic systems. Electricity is available.
9. The Snohomish County Health District has no objection to this proposal provided its requirements are met. (Exhibit 27)
10. The subject property is designated Rural Residential -5 on the GPP Future Land Use map, and is not located within an Urban Growth Area (UGA). It is not located within a mapped Growth Phasing Overlay. According to the GPP, the Rural Residential-5 designation applies to lands which were previously designated Rural by various subarea plans and have been subsequently zoned R-5. The implementing zone in this designation will continue to be the R-5 zone.
11. The proposed use (single-family detached development) is essentially compatible with existing single-family detached developments on larger lots. A comparison with the present lower density character of much of the area is inappropriate since the present density of development in much of the surrounding area is inconsistent with both the adopted comprehensive plans and the present zoning.
12. The request complies with the Snohomish County Subdivision Code, Chapter 30.41A SCC as well as the State Subdivision Code, RCW 58.17. The proposed plat complies with the established criteria therein and makes the appropriate provisions for public, health, safety and general welfare, for open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools and school grounds, and other planning features including safe walking conditions for students.
13. The proposed plat also meets Chapter 30.41A SCC requirements. A complete application for the proposed plat was received by PDS on May 31, 2005. The proposed plat as conditioned also meets the general requirements under Section 30.41A.100 with respect to health, safety and general welfare of the community as noted in this report. As proposed, the subject lots will not be subject to flood, inundation

or swamp conditions. The lots as proposed are outside of all regulated flood hazard areas. As conditioned, the plat will meet all SCC 30.41A.210 design standards for roads.

14. The subject rural cluster subdivision (RCS) application has been reviewed for conformance with the RCS standards in Chapter 30.41C SCC. The applicant has provided the information required on an RCS development plan and preliminary plat, the latest versions of which were received by PDS on February 1, 2006 (Exhibit 15), and in an open space management plan (Exhibit 8) that is to be implemented by a homeowners' association. The RCS application meets all of the criteria required for preliminary approval listed in SCC 30.41C.200.
15. The request is consistent with Section 30.70.100 SCC, which requires, pursuant to RCW 36.70B.040, that all project permit applications be consistent with the GMACP and GMA-based county codes.
16. Any finding of fact in this decision which should be deemed a conclusion is hereby adopted as such.

CONCLUSIONS OF LAW

Based on the findings of fact entered above, the following conclusions of law are entered.

1. The Examiner having fully reviewed the PDS staff report, hereby adopts said staff report as properly setting forth the issues, the land use requests, consistency with the existing regulations, policies, principles, conditions and their effect upon the request. It is therefore hereby adopted by the Examiner as a conclusion as if set forth in full herein, in order to avoid needless repetition.
2. The Department of Public Works recommends that the request be approved as to traffic use subject to conditions specified below herein.
3. The request is consistent with the (1) GMACP, GMA-based County codes, (2) the type and character of land use permitted on the site, (3) the permitted density, and (4) the applicable design and development standards.
4. Any conclusion in this decision which should be deemed a finding of fact is hereby adopted as such.

DECISION

Based on the findings of fact and conclusions of law entered above, the decision of the Hearing Examiner on the application is as follows:

The request for a 6-lot rural cluster subdivision on 21.46 acres is hereby **CONDITIONALLY APPROVED**, subject to compliance by the applicant with the following Preconditions and Conditions:

PRECONDITIONS

- A. The applicant shall provide to PDS comment and acceptance of the traffic mitigation offers from the City of Arlington and the City of Stanwood.

CONDITIONS

- A. The revised preliminary plat/rural cluster subdivision received by PDS on October 16, 2006 (Exhibit 13) shall be the approved plat configuration. Changes to the approved plat are governed by SCC 30.41A.330.
- B. Prior to initiation of any site work; and/or prior to issuance of any development/construction permits by the county:
 - i. All site development work shall comply with the requirements of the plans and permits approved pursuant to Condition A, above.
 - ii. The platlor shall mark with temporary markers in the field the boundary of all Native Growth Protection Areas (NGPA) required by Chapter 30.62 SCC, or the limits of the proposed site disturbance outside of the NGPA, using methods and materials acceptable to the county.
- C. The following additional restrictions and/or items shall be indicated on the face of the final plat:
 - i. “The dwelling units within this development are subject to park impact fees in the amount of \$811.29 per newly approved dwelling unit pursuant to Chapter 30.66A. Payment of these mitigation fees is required prior to building permit issuance; provided that the building permit has been issued within five years after the application is deemed complete. After five years, park impact fees shall be based upon the rate in effect at the time of building permit issuance.”
 - ii. “The lots within this subdivision will be subject to school impact mitigation fees for the Stanwood District No. 401 to be determined by the certified amount within the Base Fee Schedule in effect at the time of building permit application, and to be collected prior to building permit issuance, in accordance with the provisions of SCC 30.66C.010. Credit shall be given for one existing parcel. Lot 1 shall receive credit.”
 - iii. “Chapter 30.66B SCC requires the new lot mitigation payments in the amounts shown below for each single family residential building permit:
\$2,526.48 per lot for mitigation of impacts on county roads paid to the County,
\$677.71 per lot for mitigation to the City of Arlington of impacts on city roads paid to the City,
\$997.26 per lot for mitigation to the City of Stanwood of impacts on city roads paid to the City,
\$341.18 per lot for mitigation of impacts on state highways paid to the County.
These payments are due at the time of building permit issuance for each single-family residence. Notice of these mitigation payments shall be contained in any deeds involving this subdivision of the lots therein. Once building permits have been issued all mitigation payments shall be deemed paid.”
 - iv. “In consideration of the subdivision access approval, the owners of the lots of the subdivision, their heirs, successors, and assigns, covenant and agree not to protest the conversion of the subdivision private road as proposed to a public road at any time the county determines a public

road is necessary, or a public road is required for further development of any lots that have access to said road. The owners of the short subdivision lots, their heirs, successors, and assigns further agree and covenant to provide all necessary authorizations and to execute all necessary conveyance documents, at no cost and expense to the county, to accomplish the dedication and/or conversion of the private road to the county for public road purposes. This covenant touches and concerns the property, runs with the land, and is binding upon all subsequent purchasers, heirs, successors, and assigns. This covenant to provide right-of-way in no way obligates the owners to fund any construction or maintenance of a public road.”

- v. All Critical Areas shall be designated Native Growth Protection Areas (NGPA) (unless other agreements have been made) with the following language on the face of the plat;

"All NATIVE GROWTH PROTECTION AREAS shall be left permanently undisturbed in a substantially natural state. No clearing, grading, filling, building construction or placement, or road construction of any kind shall occur, except removal of hazardous trees. The activities as set forth in SCC 30.91N.010 are allowed when approved by the County.”

D. Prior to recording of the final plat:

- i. Native Growth Protection Area boundaries (NGPA) shall have been permanently marked on the site prior to final inspection by the county, with both NGPA signs and adjacent markers which can be magnetically located (e.g.: rebar, pipe, 20 penny nails, etc.). The platator may use other permanent methods and materials provided they are first approved by the county. Where an NGPA boundary crosses another boundary (e.g.: lot, tract, plat, road, etc.), a rebar marker with surveyors’ cap and license number must be placed at the line crossing.

NGPA signs shall have been placed no greater than 100 feet apart around the perimeter of the NGPA. Minimum placement shall include one Type 1 sign per wetland, and at least one Type 1 sign shall be placed in any lot that borders the NGPA, unless otherwise approved by the county biologist. The design and proposed locations for the NGPA signs shall be submitted to the Development Review and Construction Division for review and approval prior to installation.

E. In conformity with applicable standards and timing requirements:

- i. The preliminary landscape plan (Exhibit 15) shall be implemented. All required detention facility landscaping shall be installed in accordance with the approved landscape plan.

F. All development activity shall conform to the requirements of Chapter 30.63A SCC.

Nothing in this approval excuses the applicant, owner, lessee, agent, successor or assigns from compliance with any other federal, state or local statutes, ordinances or regulations applicable to this project.

Preliminary plats which are approved by the county are valid for five (5) years from the date of approval and must be recorded within that time period unless an extension has been properly requested and granted pursuant to SCC 30.41A.300.

Decision issued this 22nd day of February, 2007.
