

Allow pop-ups in Chrome

You can allow all pop-ups by disabling the pop-up blocker. Follow these steps:

1. Click the Chrome menu  on the browser toolbar.
2. Select **Settings**.
3. Click **Show advanced settings**.
4. in the "Privacy" section, click the **Content settings** button.
5. In the "Pop-ups" section, select "Allow all sites to show pop-ups."

How to disable Chrome's PDF viewer

Be able to choose to download or open PDFs in standalone apps rather than the browser window with a quick and easy fix.

Google Chrome's built-in PDF viewer can make opening PDFs super quick. Unfortunately, it breaks PDF links and you don't have access to all of the same tools you can use in apps like Adobe Reader. So how can you choose to download or open PDFs in standalone apps rather than the browser window? It's a quick fix if you follow these steps:

Step 1: Open Chrome and type "about:plugins" into the omnibox at the top.

Step 2: Scroll down and find Chrome PDF Viewer.

Step 3: Click the "Disable" link to prevent PDFs from loading within Chrome.

Step 4: Make sure you "Enable" Adobe Reader within Chrome, and set to 'Always allowed'.

Chrome Java Settings

1. Enter **about:plugins** in the URL (Omnibox) field.
2. In the Plug-ins list, look for **Java** and check whether Java is enabled (if the Disable link appears, Java is already enabled)
3. Click on the **Enable** link (if available)
4. (Optional) Check the **Always allowed** box to stop additional Chrome warnings when running Java content
