Meeting Minutes Phase 1 Development Plan – Lake Stickney 01-18-16

1. Parks was introduced by Lake Stickney Community Member Chris Armstrong.
2. Tom Teigen, Parks Director provided update on county's intent to make an offer on neighboring parcel.
3. Logan Daniels, Parks Engineer facilitated PowerPoint (attached).
4. Comments from attendees on the site plan were as follows:
 - Q. Will there be a drinking fountain?
 - R. If budget allows and if a suitable service line exists a drinking fountain may be part of the design
 - Q. Will there be a community garden?
 - R. Community gardens were not suggested or at minimum did not receive high ranking at the previous public meetings. Conditions including critical areas and lighting aren't very conducive to gardens at this location. Esperance County Park is slated to have a community garden.
 - Q. Will there be a restroom?
 - R. A restroom is not feasible at this time as cost would be nearly half of budget. A portable ADA restroom will be installed. The design consultant will look at providing for future infrastructure for restroom if location is such that installing under this phase would limit disturbance of any new improvements.
5. There was a consensus that Site Plan as presented is acceptable.
6. Community requested that another public meeting be held once studies are conducted to identify any changes needed to the site plan based on study outcomes.
