

## **SUBCOMMITTEE DISCUSSION B**

### **PRIORITIZING ECOSYSTEM RECOVERY PLAN COMPONENTS**

#### **Purpose**

The purpose of this exercise is to determine appropriate sequencing/prioritization for the components identified during the Subcommittee Discussion A.

#### **Framing the Discussion**

The worksheet on the next page provides questions to help with considering the sequencing and prioritization that may be appropriate for the components we have identified.

Please focus your discussion on the components relevant to your Subcommittee's grouping. These worksheets will be compiled by Support Staff, and a complete prioritized list of components will be sent to the group for review and comment after the meeting.
