NOTICE OF LAND DISTURBING ACTIVITY

(Pursuant to the provisions of Chapters 30.70.050(2) and 30.63.B SCC)

Project Name: Bridge 453 Deck Replacement Project

Project Number: RC1623

Project Description: Replacement of the existing, deteriorating fiber-reinforced polymer (FRP) bridge deck with a precast, pre-stressed, concrete panel decking system. Minimal ground disturbance and grading (approximately 72 cubic yards) will occur when the roadway approaches to the bridge are excavated out to install reinforced concrete slabs. This will be followed by paving of the deck and the approaches. Cast-in-place concrete curbs will be installed to support the guardrail. No work would occur in the Little Pilchuck River. The construction activities will take place in Summer, 2013. They will require a road closure of approximately 4-6 weeks, and the detour route will be via 163rd Avenue NE, Goebel Hill Road, and 147th Avenue NE.

Project Location: On 84th Street NE (Getchell Road) between the Cities of Lake Stevens and Granite Falls, approximately 1 mile west of the 84th Street NE intersection with State Route 92 (Township 30N, Range 6E, Section 22, W.M.)

Type of Project: Public Works Project

Completeness Date: Summer, 2013

Permits/Approvals Required: Land Disturbing Activity Permit, Hydraulic Project Approval, SEPA Addendum

End of Comment Period: February 19, 2013

Senior Planner: Julie Highton at 425-388-3488, ext. 2341
