May 23 rd , Wednesday (<i>NTA Approval</i>)	May 31 st , Thursday (<i>NTA Approval</i>)
4 th meeting in late summer/early fall ³	November 1 st , Thursday (<i>Adaptive Management</i>)

Implementation Committee Subcommittees

The bylaws provide that the LIO Implementation Committee can establish ad hoc committees and work groups to advise or advance the Action Agenda priorities not currently coordinated by existing forums or committees (i.e. basin specific local recovery goals).

Initial subcommittee meetings will be focused on review of NTAs. Other meetings should be established by topic and relationship to adaptively managing the LIO Ecosystem Recovery Plan.

¹ Please note that LIO content may be shared among other SWC agenda items.

² Both the LIO and LE Coordinators will work on combined meeting agendas and meeting materials with the SWC Co-Chairs.

³ Options in July, September, October, and November to approve work on LIO recovery goals (i.e. floodplains) or other adaptive management needs.

We will seek to establish an implementation lead to work with the LIO Coordinator on meeting space, meeting materials, and general organization/effectiveness logistics for those meetings.

Should the workplan necessitate, the draft meeting schedule for the Snohomish Basin IC subcommittees/work groups is copied below:

- February 22nd, Thursday (NTA Review Subcommittee, if needed)
- May 17th, Thursday (NTA Review Subcommittee, if needed)
- September 13th, Thursday (LIO recovery goals & integration of new information)
- October 11th, Thursday (LIO recovery goals & integration of new information)

Representatives from the Stillaguamish Technical Advisory Group (TAG) will form the necessary subcommittees (i.e. NTA review subcommittee) for the Stillaguamish basin. We will utilize existing TAG meetings to address LIO adaptive management needs and NTA review.

Additional subcommittees will be established on an informal basis as needed to serve a particular purpose, such as studying an issue in depth.
