Category discrepancy explanation

EMS discrepancy explanation

Both the Category and EMS discrepancies are attributed to two situations that occurred during the election. The first situation was three empty envelopes discovered after any link to the voter was broken, preventing any removal of voter credit. The second situation was four batches were identified to contain an additional ballot after any link to the voter was broken, preventing a determination of which two ballots were returned in the same envelope.

There is no category for extra ballots in a batch on the reconciliation spreadsheet so the numerical difference is 4 for the EMS and 1 for the ballot categories.
