

We Want You To Know..

The culvert replacement project on 51st Ave SE scheduled for this summer has been rescheduled to next year. The culvert will be replaced during summer 2013. Since the project will not take place this year, the road will be open.

Construction on a year-long intersection improvement project will begin in early August 2012 at the intersection of 180th St SE and 35th Ave SE. Single lane closures will be in effect at that intersection, but there are no closures planned at this time.

Visit Snohomish County's web site, www.snoco.org, and search *180th St SE* to learn more about that project.

Thank you,
