Subject: Re: point wells

This is the third time I have tried to email you. The address on the postcard that was sent out does not go through to you.

1. What is the emergency route planned for an alternate way out of Point Wells?
 2. What is the estimated trauma to the birds that migrate through Richmond beach and how does the developer plan to address that?
 3. What is the expected impact on the schools? Has shoreline or the developer budgeted for the extra help and classrooms necessary to provide for the extra school population?
- Does shoreline and Smohish county have a qualified Architecture Review Board in place to see this development through to completion?

Thank you.
