Comments:

If the taxes generated by the proposed development are collected by:

A) Snohomish County?
B) King County? (City of Shoreline?)
C) Distributed between the two counties?

Will Snohomish County collect the taxes on all of the Apts. add. units in perpetuity?

Will the developer pay for future mitigation projects and how?

City of Shoreline?

Input to the scope of the EIS can be given verbally at the public scoping meeting or in writing at any time during the comment period, which ends on March 3, 2014. Written comments can be sent to:

Darryl Eastin – Principal Planner

1) At the time Standard Oil offered the property for sale, was the parcel EAST of the railroad tracks included in the offering?

2) The road access through Woodway was used by Standard Oil during the 30's & 40's, but "washed" out. Road construction has improved vastly in 80 years. The contour lines with the housing development in the 70's on Syre Hill in Richmond Beach are similar to the contour lines in the area where the original Standard Oil road was constructed in Snohomish County. I am Snohomish County to relieve the entrapment of 3000+ people who need and have to endure.

3) Please investigate the ownership, zoning and possible future use for restoring that road.

4) Would Snohomish County consider purchasing that road access?

5) Who or what entity segregated the east side of the property from the west side?

---

My husband drove our family over this pass in 1973. If they could build roads like these forty years ago, and Standard Oil could build the Pebble Island Road eighty years ago in Anchorage County, then, with the improvements mankind has acquired by going to the moon, for certain Blue Square could purchase the 20 acres from Chevron. (It would be interesting to find out why this acre was segregated from the whole.) Further, additional 3 acres or so, and build a road?

1. Where will the 4/16 kids (children) go to school?
3. When Hilltop Elementary School is ready, how much, if anything, will it cost? I went to school for free. The North District
4. In the event of a bedroom regulation call for 2-man crew.
5. Rain/Shahomack County wants to flood the lower hill with approx. 5-7 thousand people are trapped with only one-way out of their trailers. The case of an earthquake.

Prepare for a Tsunami

1. Establish meeting places and phone numbers in case you need to evacuate. Make arrangements for housing in the event you need to evacuate.
2. Learn about the tsunami risk in your community.
3. What to do during a tsunami: avoid coastal areas; stay inland; avoid the ocean or other bodies of water; stay away from bridges, tunnels, and embankments.

Prepare for an Earthquake

2. Practice drop, cover, and hold. If you physically practice this, you'll have a better chance of remembering what to do during an earthquake.
Landslides: Is Your Home Safe?

Plan 2 Ways Out! From 2 ways out:
- Plan and physically practice a home escape plan as part of your family disaster plan.
- Draw an escape route from every room and practice how to safely exit in the event of a fire.
- Know the minimum recommended size is 2410sq ft.
- Have a fire extinguisher available and know when and how to use it.
- Even if you are a cigarette smoker, you will not spread the smoke.
- Install and maintain smoke detectors on every level and children playing with fire.
- Most flat fires happen at night while you're sleeping.
- Prevent and prepare for a fire at home.
- Learn how to prevent fires in and around your home.
