Subject: Point Wells EIS scoping

Dear Mr. Eastin:

I am writing to comment on the scope of the Environmental Impact Statement required of the Point Wells Mixed-Use Redevelopment Project.

The plan as published has a high-density urban center being built in Snohomish County with the only road in or out going south through King County and the City of Shoreline. Does the plan call for sewage treatment to take place in Snohomish or King County? Does the plan call for Police response to come from Snohomish or King County? Does the plan call for Fire and Emergency Medical to come from Snohomish or King County?

To be direct, does the plan call for the taxes to pay for these services to come from Snohomish or King County?

The existing environment for the City of Shoreline in King County is one in which their taxes are used for their benefit. An environment in which increased taxes are levied on King County residents for the benefit of Snohomish County residents is a hostile environment indeed.

Thank you for your kind attention.
