

To: Darryl Eastin, Project Manager

Re: Point Wells Development; PFN 11-101457-000-00-LU

Date: April 6, 2011

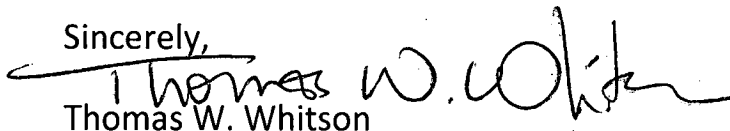

Mr. Eastin:

Please consider this letter as an official response to the project application referenced above. With such action, we establish our rights as Party of Record.

We object to the scale of the proposed project, the impact to both the local environment, and the community, due to traffic, proposed building heights, and the known existence of Native American history and artifacts .

There has been limited interest on the part of Snohomish County to engage the impacted communities in both Snohomish and King Counties and to provide leadership to create an appropriate approach to development at Pt Wells. I hope the forthcoming SEPA review will shed considerable light on not only the true potential impact to our communities but the haphazard lack of concern the County has exhibited by providing an Urban Center designation for the benefit of both the County and the Developer at the expense of the local residents.

Sincerely,

Thomas W. Whitson
