---

I do not support the development at Point Wells. First, this area is a residential area of single family homes. This development is out of context with the surrounding area. Second, there is one two-lane road in and out of the area. This road cannot support the level of traffic that a development the size of the proposed Point Wells development would bring. What if a major fire happened within the development? Fire trucks would have one road to access the development. This is not safe for the prospective residents, it is not safe for the surrounding residents. There are no fire boats within a reasonable distance. Third, the City of Shoreline and the City of Woodway do not have the resources to support a development of this magnitude. This includes the infrastructure, fire and police services that would be required.

This development is out of scale with all surrounding development, both in Shoreline and Woodway.

Please vote no.
