Hello--

I hope this is not too late to send a comment about how I think the proposed development would be devastating for the community of Richmond Beach. I have been a resident there for over 20 years and I have already seen how the traffic has increased and even more so now with our "road diet". My understanding is that there have been at least 42 points of contention with this project; to date, 41 of those points remain inadequately addressed or not responded to at all. Quite apart from the aesthetic and logistical considerations that make this project terrible for the environment and those of us who live here, the amount of time, energy, and tax-payer dollars being spent to accommodate a foreign speculator should, at this point, take a Point Wells Urban Center (or even an "Urban Village") completely off the table.

Thanks for listening,

Sincerely,

Amy Boone
