

We want you to know...

A Snohomish County Public Works crew will replace a failing and undersized culvert under 180th Street SE west of Fales Road. The project will take up to eight weeks of work beginning July 8 at 6:30 a.m., and will require alternating single lane closures. Construction personnel will work with area residents to provide access to homes at all times. The residents sharing the 11318 driveway will have to go west and turn around during parts of the project.

We regret the inconvenience and appreciate your patience during construction. Thank you.
