

## S. Fork Sauk River Bridge #540 Update

Hello,

Work is continuing on the Bridge #540 replacement project. Staff from the Anchor QEA consulting firm will be in the area collecting data for the Channel Migration Zone Study they are preparing for Snohomish County.

The consultants plan to spend one day in the field sometime during the week of September 10, and another day in the field during the last week of September or first week in October.

Preliminary results of the study may be available for the project team sometime in December. The completed report will be ready in early 2013, and will provide information needed for design of the bridge.

Thank you,  
Tina Hokanson
