

S. Fork Sauk River Bridge #540 Closed to Vehicles

The County Engineer has called for an immediate closure of Bridge #540 to vehicles until further notice. An inspection of the bridge in early May 2012 revealed additional cracks in one of the log girders supporting the structure. **The bridge remains open to pedestrians.**

We are working diligently on options for repair. Any work will include environmental permitting. We will send an e-mail and mailer when new information is available.

If you have questions please forward them to me via e-mail, mail or phone. We will keep all property owners informed at the same time through the mail and e-mail updates.

Thank you,

Tina Hokanson, Communications Specialist
