

# Road closure Aug. 1-21 for culvert replacement

Snohomish County Public Works Surface Water Management will replace an undersized culvert beneath 67th Ave., north of 152nd St., near Marysville. Starting Aug. 1, crews will completely close 67th Ave. and close one lane of 152nd St. for up to three weeks to dig out, remove and replace the culvert. Drivers will follow a signed detour using 132nd Ave., 51st St. and 172nd St.

The new, larger culvert will help reduce flooding, improve fish passage, and keep the roadway from developing dips and potholes. The existing culverts are too small to handle large volumes of water, and the roadway often floods during heavy rains.
