Snohomish County Maple Rd and Ash Way Intersection and Drainage Improvement Project Garners Construction Excellence Award

Snohomish County Public Works and IMCO General Construction Honored with Build Washington Award from Associated General Contractors of Washington

EVERETT, Wash., Friday, May 17, 2019 – The Maple Rd and Ash Way Intersection and Drainage Improvement project was completed ahead of schedule and under budget in 2018. As a result, Snohomish County Public Works and IMCO General Construction were recently honored for their work with the Build Washington Award for Construction Excellence by the Associated General Contractors (AGC) of Washington.

“IMCO maintained an ambitious schedule on the project and our teams worked seamlessly together,” Snohomish County Public Works Director Steve Thomsen said. “Those two factors allowed this project to be completed without the need for a second season of construction and \$1.2 million under bid.”

The project reconstructed 700 feet of Maple Rd and 600 feet of Ash Way, along with a portion of the Interurban Trail, on nearly 800 steel pilings. As a result, the intersection was raised approximately five feet in elevation. New fish-passable culverts were also installed. The work is designed to ease routine flooding from Swamp Creek at the intersection.

Funding from Snohomish County Surface Water Management and Lynnwood Public Works financed the project, which straddles the boundary between Snohomish County and the City of Lynnwood.

About Snohomish County Public Works

The Snohomish County Public Works Department constructs and maintains county roads; controls and manages surface water quantity, quality, and fish habitats; and oversees the recycling and disposal of solid waste. The department’s main office is located at 3000 Rockefeller Ave., Everett, WA 98201. For more information about Snohomish County Public Works, visit www.snohomishcountywa.gov/PublicWorks.
