Subject: BSRE variance request

CAUTION : This email originated from outside of this organization. Please exercise caution with links and attachments.

Dear Paul,

Gary and I live in Woodway and we would like to submit our disapproval of BSRE's request to expand the height limit for their development to 180 feet with additional setback restrictions to be expanded as well. We live above the Point Wells property, and if this project is allowed to double in it's height restriction, then our view would definitely be impacted, not to mention the increased number of residents that would be occupying the development and the negative environmental impact it could potentially have.

Please continue to fight for the residents of Woodway and keep the high rise developments to a maximum height of 90 feet.

Thank you for your help and consideration in this matter.

Sincerely,

Gary and Joan Proctor
