Dear Mr MacCready:

This is a brief response to your recent post card notification c. variance requests. As my wife Janis and I have attended open meetings, we appreciate your including us on your requests for feedback.

The PRIMARY issue is one where the decisions made in Snohomish County will largely impact King County, Shoreline: Richmond Beach, Richmond Highlands, and Innis Arden.

The variances you request do not address the negative impacts of lengthy construction and the ongoing dilemma of transportation access.

We in Shoreline absolutely will not live with the enormity of your proposed traffic corridor through our neighborhoods into your county.

Your requests for variances c. setback and height restrictions seem to miss the basic issue.
