Dear Ryan,

My thoughts are that that 2000+ units are way too many and there needs to be two major points of ingress and egress, one through Woodway and one through Richmond Beach. Water levels are rising, consult Google maps and projections for the next 10 years. Building that huge development does not make sense.

The traffic would be a huge concern and a risk in the event of an emergency such as an earthquake, fire, rising waters, or even routine fire department calls for Heart attacks and falls.

I’m against it.
