Snohomish County:
I am just amazed that Point Wells is allowed to continue draining the County and townships of resources (time, money and energy). I have seen no hysteria over the issue—only amazement. Why can’t this stop after all their failures to meet the requirements of an Urban City in a place where there is only one access road (the second one through the Town of Woodway is doubtful due to landslides!)? With Covid 19 and the election on everyone’s minds, you may not hear from very many residents, but I believe if a survey were sent out to all, you would receive an overwhelming number of residents who are against the project, mainly to do with the developer’s unwillingness to adapt to fewer number of occupants and greater height restrictions.

Thank you for your work and for your consideration.

Vivian Johnson
