Dear Hearing Examiner,

My concern about the proposed project in Pt. Wells is the amount of traffic that will be generated. I live in Richmond Beach, near Richmond Beach Road. Travel in and out of our neighborhood involves using Richmond Beach Road for almost all normal, daily activities. Having the additional traffic from Pt. Wells will have a very negative affect on our daily lives. Even if a road in and out of the development is created, as required, many people will still use Richmond Beach Road as it gets them more directly to their destinations.

Please reconsider building such an extensive development. Ideally the land should be a park so people can get close to nature and combat the increasing climate problems. If buildings must be there, please make them few and far between with easy access in and out using roads other than Richmond Beach Road.

Thank you for your attention to my concerns.
