- NEW: Stilly.SLS-EC.Project List_Presentation. 3.24.20v2 (provided today)

STILLY IT COMMITMENT SUITES OF ACTION LIST AND FBD

The following list of actions are being discussed by the Stilly IT for possible movement forward into potential funding application processes. The current total for this list is estimated at 23M. Some funds have already been secured and may be able to serve as match for other funding sources. Certain actions may not be supported locally and as such not ready or able to move forward as part of an integrated effort. These have been noted in addition to other potential areas where additional support is likely necessary for success. The Stilly IT will be working to improve and refine this list in preparation for the full FbD application submission by July 31, 2020 alongside pursuing other funding opportunities. Please send comments to cmacilroy@gmail.com

NOTE: 13 of the 24 projects on the list currently have some notation of issues that need further work/addressing to successfully move forward.
