Snohomish Basin Salmon Recovery Forum

Business

March 3, 2022
Regional Updates

- Snohomish - Stillaguamish Local Integrating Organization
- Puget Sound Action Agenda update
- Federal and state legislative / funding update
- Puget Sound Salmon Recovery Council

New J pod calf, J59
Forum Business

Meeting Summary
- Reminder - available on website

2022 Snohomish Basin Salmon Recovery Grant Round
- Decision in June
- If necessary, we will convene in Aug. for FINAL decision

Cost increase
- Memo will be sent for review; decision made outside of meeting
The Forum will be responsible for recommending allocation of ~$3M in state and federal salmon recovery (SRFB) and Puget Sound Acquisition and Restoration (PSAR) funding

- 12 proposals
- $5.6M ask

*The Forum will also be requested to review and recommend projects seeking PSAR large cap funding and Floodplains by Design funding and potentially support applications for other funding sources (NOAA, ESRP, etc.)
Project - reconnect side channels and install in stream and mainstem log jams on County-owned parcel in the Middle Pilchuck River

- Project received funding in 2020 for final design and construction
- SnoCo asked to revise a few elements in final design
- Revisions, which include an increase in channel length and pieces of wood, and increases in material costs, result in cost increase of $347,970
- Forum has been asked to allocate Basin PSAR return funds ($108,389) to partially cover the cost increase
- SnoCo will cover the remaining funding gap
Letter of Support - FbD proposal

Place shapes on continuum to indicate level of support

- Endorsement
  “I like it”

- Endorsement with a minor point of contention
  “Basically I like it”

- Agreement with reservations
  “I can live with it”

- Stand aside
  “I don’t like it, but I don’t want to hold up the group”

- Block
  “I can’t live with it”
Guided by five goals that drive action toward outcomes that can be measured in short- and long-terms:

1. Protect and clean up aquatic habitat.
2. Restore, conserve and connect forests and riparian habitat.
3. Revitalize urban forests and streams.
5. Reduce and combat climate impacts.
